ONE SYSTEM | ONE APP | ONE SERVICE | 10 YEARS WARRANTY

Complete home energy from a single manufacturer

THE NORD STORY AND INNOVATION

Innovation from Norway, quality from the EU

We are not just technology sellers. We are a proud member of the prestigious Nordic Edge innovation cluster. Our EcoCloud control software runs on secure European AWS servers, placing absolute emphasis on your cybersecurity and technological edge.

The guarantee of absolute reliability is our strategic EU importer, GBC Solino, with its 25-year history.

CONTROL SYSTEM (HEMS)

Central Intelligence

NORD intelligent control systems will take complete control of you r energy. From photovoltaics and heating to car charging. The system autonomously ensures that every generated kilowatt delivers maximum benefit.

- **Automation based on spot prices and weather**
- **Remote management from anywhere** (EcoCloud)
- **Data protection on secure European AWS servers**

PHOTOVOLTAICS

The foundation of energy self-sufficiency

Photovoltaics from NORD HT isn't just about electricity generation. It's a perfectly synchronized energy source that smartly powers your appliances, heats water, provides heating, and charges your car. Get a system that squeezes the maximum out of every sunbeam - today and in ten years' time.

- **Asymmetrical operation** (delivers energy where it's needed)
- **Scalable batteries** (from 7.5 to 33 kWh))
- **Bifacial panels** (power even from reflected light)

HEATING TECHNOLOGY

Comfort and radical savings

From highly efficient heat pumps to smart storage solutions and water heating. Get a comprehensive heating ecosystem that guarantees maximum thermal comfort, a radical reduction in bills, and uncompromising reliability.

- **Flow temperature up to 75°C** (ideal for new builds and old radiators)
- **Eco-friendly R290 refrigerant** (technological and legislative certainty)
- **Smart thermal storage** (direct storage of solar surplus into water and heat)

HEAT RECOVERY AND VENTILATION

Fresh air without unnecessary losses

Ensure a constant supply of fresh air in your home without unnecessary heat loss. The heat recovery unit will take care of a clean and healthy environment for your family.

- **Built-in ionizer**
- **Efficient G4 air filtration**
- **Energy-saving and quiet fans**

Calculate the potential energy and cost savings for your house

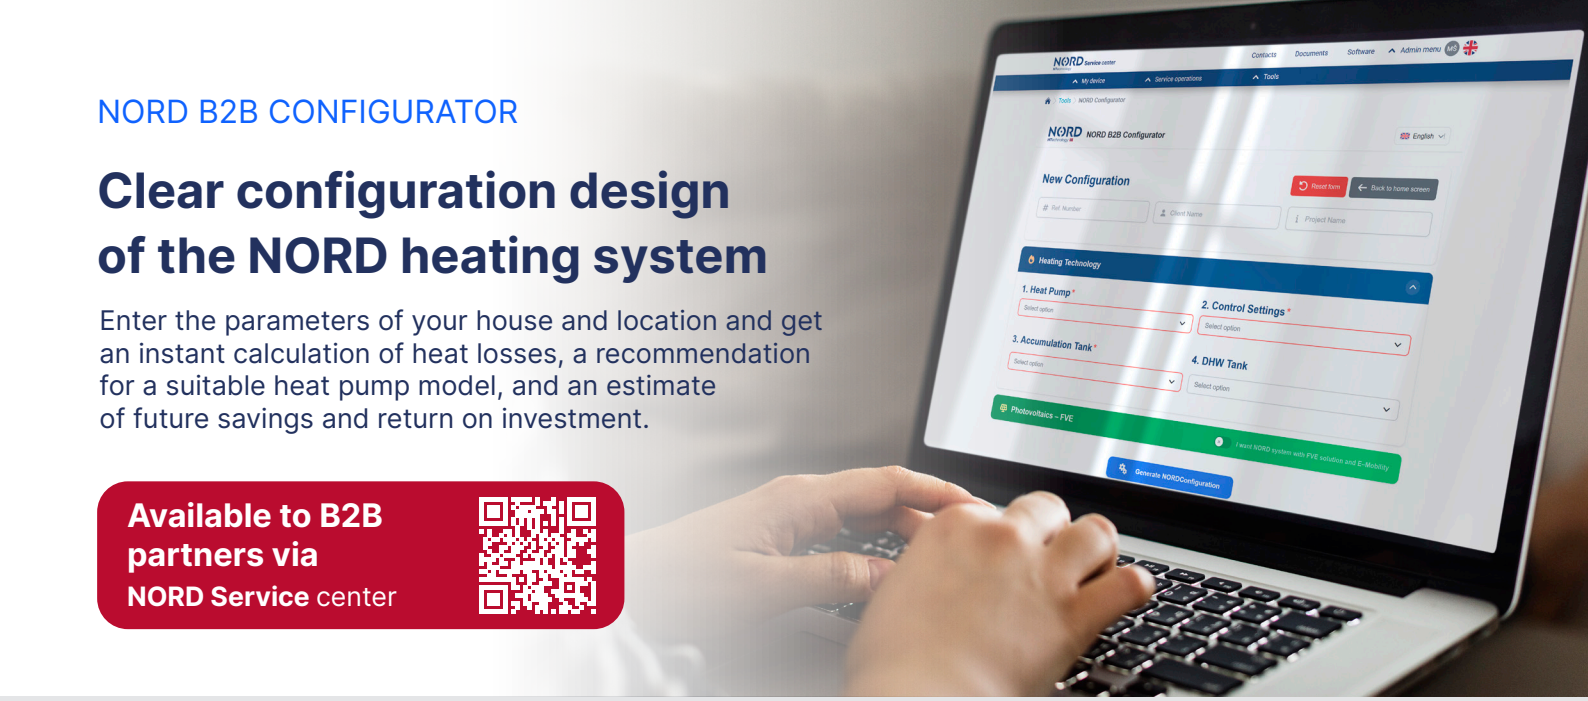

Find out in 2 minutes how much you can save with a NORD heat pump.

NORD B2B CONFIGURATOR

Clear configuration design of the NORD heating system

Enter the parameters of your house and location and get an instant calculation of heat losses, a recommendation for a suitable heat pump model, and an estimate of future savings and return on investment.

Available to B2B partners via NORD Service center

CONTROL YOUR SYSTEM FROM ANYWHERE

EcoCloud

EcoCloud allows remote system control, access to statistics and graphs. Everything is securely stored on the Amazon Cloud. The software is developed in the EU, ensuring security, data protection, and reliability.
